RMBS Presale Report

Paragon Mortgages (No. 9) PLC
£700 Million (Equivalent) Mortgage-Backed Floating-Rate Notes

Analyst: Andrea Gutermuth, Frankfurt (49) 69-33-999-305, andrea_gutermuth@standardandpoors.com
Surveillance analyst: Sean Hannigan, London (44) 20-7176-3783, sean_hannigan@standardandpoors.com

This presale report is based on information as of June 29, 2005. The credit ratings shown are preliminary. This report does not constitute a recommendation to buy, hold, or sell securities. Subsequent information may result in the assignment of final credit ratings that differ from the preliminary credit ratings. For further ratings information, call Client Support Europe on (44) 20-7176-7176. Members of the media may contact the Press Office Hotline on (44) 20-7176-3605 or via media_europe@standardandpoors.com. Local media contact numbers are: Paris (33) 1-4420-6657; Frankfurt (49) 69-33-999-225; Stockholm (46) 8-440-5914; or Moscow (7) 095-783-4017. Investors are invited to call the SF Investor Hotline on (44) 20-7176-3223.

Class	Prelim. rating*	Prelim. amount (Mil. £ equiv.)	Available credit support (%)	Interest	Step-up margin date	Optional call date	Legal final maturity
A	AAA	624.4	12.56	Three-month U.S. dollar LIBOR/three-month British pound sterling LIBOR/three-month EURIBOR plus a margin	May 2010	May 2009	May 2041
B	AA	27.3	8.66	Three-month British pound sterling LIBOR/three-month EURIBOR plus a margin	May 2010	May 2009	May 2041
C	A	48.3	1.76	Three-month British pound sterling LIBOR/three-month EURIBOR plus a margin	May 2010	May 2009	May 2041

*The rating on each class of securities is preliminary as of June 29, 2005 and subject to change at any time. Final credit ratings are expected to be assigned on the closing date subject to a satisfactory review of the transaction documents and legal opinion, and completion of a corporate overview. Standard & Poor's ratings address timely payment of interest and principal.

Transaction Participants

Originators	Paragon Mortgages Ltd. and Mortgage Trust Ltd.
Arranger	JPMorgan Securities Ltd.
Security trustee	Citicorp Trustee Co. Ltd.
Substitute servicer	GHL Mortgage Services Ltd.
Underwriters	JPMorgan Securities Ltd. and The Royal Bank of Scotland PLC
Sellers	Paragon Mortgages Ltd. and Mortgage Trust Services PLC
Administrators and servicers	Paragon Finance PLC and Mortgage Trust Services PLC
Interest-rate swap counterparties	ABN AMRO Bank N.V. and JPMorgan Chase Bank, N.A.
Currency swap counterparty	ABN AMRO Bank N.V.
Transaction account provider	National Westminster Bank PLC
Flexible drawing facility provider	Barclays Bank PLC

Supporting Ratings

Institution/role	Ratings
National Westminster Bank PLC as transaction account provider	AA/Stable/A-1+
JP Morgan Chase Bank, N.A. as interest-rate swap counterparty	AA-/Stable/A-1+
ABN AMRO Bank N.V. as interest-rate and currency swap counterparty	AA-/Stable/A-1+
Barclays Bank PLC as flexible drawing facility provider	AA/Stable/A-1+

Transaction Key Features

Expected closing date	July 19, 2005
Collateral	Portfolio of first-ranking residential mortgages secured over freehold, leasehold, or feudal properties in the U.K.
Principal outstanding of provisional mortgage pool (Mil. £ equivalent)	558.88
Geographic concentration - London and southeast (%)	44.49
Property occupancy	100% buy-to-let
Weighted-average LTV ratio (%)	77.51
Average loan size balance (£)	106,717
Loan size range (£)	509 to 2,000,000
Weighted-average seasoning (months)	16.56
Weighted-average asset life remaining (years)	20.97
Weighted-average mortgage interest rate (%)	5.94
Redemption profile	11.71% repayment, 88.29% interest-only
Excess spread at closing (%)	1.58
Cash reserve (%)	1.760, building up to 2.260 if arrears trigger is hit
Maximum LTV ratio (%)	88.75
Principal deficiency ledger	0
Percentage of jumbo loans (> £150,000) by number of loans	18.01

Transaction Summary

Preliminary credit ratings have been assigned to the £700 million (equivalent) mortgage-backed floating-rate notes to be issued by Paragon Mortgages (No. 9) PLC. The preliminary ratings were assigned on the basis of the provisional pool cut, comprising residential mortgages in the amount of £560 million. By closing, the pool will have increased to £700 million. The final pool will feature the same composition as the provisional pool cut, and WAFF and WALs tests will be conducted to ensure that the final pool has the same credit quality as the provisional pool.

The ratings reflect the transaction's sound payment structure, the ability of the servicers (Paragon Finance PLC and Mortgage Trust Services PLC) to perform their roles, and the cash flow mechanics of the transaction.

Further key considerations include the strong protection for the class A and B noteholders provided by a combination of the subordinate class C notes (6.90% of the notes issued), the first-loss fund (1.76% of the notes issued, building to 2.26% of the initial note balance if loans greater than 60 days in arrears exceed 3.00%), and excess spread to cover credit losses and income shortfalls. Strong protection for the class C noteholders is provided by the first-loss fund and excess spread to cover credit losses and income shortfalls.

Notable Features

This is Paragon Mortgages' 10th securitization of its buy-to-let mortgages. The main structural features of this latest transaction closely resemble those of the previous ones.

Strengths, Concerns, And Mitigating Factors

Strengths

- The borrowers are high quality, with no adverse credit history (e.g., no county court judgments).
- The sellers and administrators have an experienced and sound understanding of the buy-to-let market (100% of mortgages in the portfolio are buy-to-let). This experience, coupled with strong underwriting standards, has kept arrears below the industry average.
- The transaction includes an efficient payment structure for investors, which provides support to all the notes through the use of triggers when the transaction is under stress. This is achieved by stepping up the cash reserve by an additional 50 bps, if arrears greater than 60 days exceed 3%. At the outset, the notes will amortize sequentially, but will begin to redeem pro rata after five years (the step-up date), subject to further conditions (see "*Mandatory redemption*").

Concerns and mitigating factors

- The issuer is obliged to make mandatory further advances, and may opt to make discretionary further advances. This is mitigated by the condition that the sum of all mandatory and discretionary further advances does not exceed a combined aggregate cumulative limit of 16% of the notes to be issued (with the exception of Mortgage Trust redraws). Mandatory further advances will be funded through principal redemption funds. If insufficient principal redemption funds are available, the issuer can (at the subordinate lenders' discretion) borrow further amounts under the subordinated loan. In the case of mandatory further advances on flexible mortgages, the issuer will fund these advances by making drawings under the flexible drawing facility agreement, which will be provided by Barclays Bank PLC. This provides further comfort that the issuer will meet the obligation to make mandatory further advances on flexible mortgages.
- Flexible mortgages (accounting for 28.06% of the provisional mortgage pool) allow borrowers to prepay their mortgages and subsequently redraw the amounts prepaid. Further advances in relation to these redraws are the obligation of the issuer. There is a concern that under severe circumstances, the issuer will have insufficient available funds to meet these obligations. The potential redraw risk is covered through the flexible drawing facility. Commitment fees that will become payable in connection with the issuer's drawings under the flexible drawing facility have been adequately accounted for in the cash flow analysis.

Paragon Mortgages (No. 9) PLC (issuer)

The issuer is incorporated as a public company and was established under the laws of England and Wales on Aug. 16, 2002. Paragon Mortgages (No. 16) Ltd. hold 26% of the issuer's share capital, with the remaining 74% held by The Paragon Group of Companies PLC, the ordinary shares of which are listed on the London Stock Exchange.

The issuer was established with the purpose of issuing the notes and purchasing the mortgage pool. Despite the fact that the issuer was established three years ago, it has not commenced operations and no audited financial statements of the issuer's accounts have been made up. Furthermore, there has been no material adverse change in the financial position or prospects of the issuer and no significant change in its trading or financial position. The issuer has five independent directors. It fully meets Standard & Poor's SPE criteria for bankruptcy remoteness.

Paragon Mortgages Ltd. (originator)

Paragon Mortgages is a private company incorporated in England, and is the originator of 59.15% of the mortgages in the portfolio, either directly or indirectly via broker intermediaries.

Paragon Mortgages has established itself as a specialist lender in the buy-to-let sector, and its operations and underwriting standards are robust. Paragon Mortgages targets the professional landlord, who will normally have had several years' experience in property investment and have more than three properties. These borrowers will be underwritten based on rental cover, usually set at a minimum of 125% above borrowing costs. As part of the underwriting process, a full assessment of the borrowers' financial history and status will also be made. More than 80% of Paragon Mortgages' loans in the provisional pool are made to professional landlords.

Mortgage Trust Ltd. (originator)

Mortgage Trust, an established mortgage lender, was acquired by the Paragon Group on June 30, 2003. Mortgage Trust now operates exclusively in the buy-to-let sector, and is the originator of 40.85% of the mortgages in the portfolio.

Mortgage Trust targets both the professional landlord and private investor landlords who purchase property to let, usually for either long-term investment purposes, or with the aim of becoming a professional landlord. Mortgage Trust's underwriting process is similar to Paragon Mortgages, based both on rental cover and a borrower financial assessment. Private investors typically have between two and five properties. Approximately 52% of Mortgage Trust's loans in the provisional pool are made to private investor landlords; the remaining 48% are made to professional landlords.

Citicorp Trustee Co. Ltd. (security trustee)

The security trustee's role is to supervise the administration of the issuer under the terms of the transaction and to generally represent and protect the interests of the noteholders. Only the trustee will be able to enforce the security under the terms and conditions of the notes and it must always act in the best interests of the noteholders.

Paragon Finance and Mortgage Trust Services (mortgage administrators and servicers)

As administrators, Paragon Finance will be responsible for the day-to-day administration and ongoing servicing of the underlying portfolio of mortgages originated by Paragon Mortgages. Mortgage Trust Services will be responsible for the day-to-day administration and ongoing servicing of the underlying portfolio of mortgages originated by Mortgage Trust. Paragon Finance and Mortgage Trust Services are also responsible for producing all reports and accounts for the trustee and Standard & Poor's in connection with the performance of the mortgages.

Standard & Poor's is comfortable with Paragon Mortgages' and Mortgage Trust's origination, underwriting, and valuation processes, as well as Paragon Finance's and Mortgage Trust Services' collection and default management procedures (as administrators). An ongoing monitoring of their performance will be an integral part of the surveillance process.

Paragon Loan Finance (No. 2) PLC and Mortgage Trust Services (subordinated loan provider and shortfall fund provider)

Paragon Loan Finance (No. 2) PLC and Mortgage Trust Services will also provide a subordinated loan to the issuer, which will fund the first-loss fund on the closing day. The first-loss fund is a cash reserve, which forms part of the credit enhancement for the notes.

National Westminster Bank PLC (transaction account provider)

National Westminster Bank PLC (Natwest; AA/Stable/A-1+) will provide the issuer's transaction account. Payments from Paragon Mortgages' borrowers will be paid into a collection account, which is also provided by NatWest, but held in the name of Paragon Mortgages. Cash standing to the credit of the collection accounts will be transferred to the issuer's transaction account. Similarly, payments from Mortgage Trust's borrowers will be paid into a collection account at Barclays Bank, and held in the name of Mortgage Trust Services. Cash will then be transferred to the issuer's transaction account held with NatWest.

Transaction Structure

At closing, and in accordance with the terms of a mortgage sale agreement, the issuer will acquire from Paragon Mortgages and Mortgage Trust Services the beneficial interest in certain mortgages (issuer mortgages). These mortgages will form part of the security for the notes (see "Security package"). The borrowers in respect of the mortgages are individuals or limited liability companies (with guarantees from individuals) incorporated under U.K. law (see chart).

Paragon Mortgages (No. 9) Structure

At closing, the issuer will purchase the pool of mortgages from the sellers with the funds obtained from issuing the class A, B, and C notes.

All of the classes of notes will be secured over all of the mortgages in the pool. Repayments to noteholders will be financed from the cash flow generated on the mortgages.

Security package

Under the deed of charge to be entered into between the issuer and the trustee, the notes will be secured by a first-fixed charge over the issuer's interest in the mortgages, the issuer's rights under various insurance policies relating to the securitized mortgages, the issuer's rights under the transaction documents, and the issuer's rights to all money standing to the credit of the issuer's bank account with NatWest. Additionally, the issuer's security interest in any cash investments is secured by way of a floating charge, ranking behind preferred creditors.

Conversion mortgages

The administrator may convert a borrower's mortgage into any other type of mortgage if certain conditions are met. These conditions include the following:

- No enforcement notice must have been given by the trustee.
- Conversion will not affect the then-current ratings on the notes.
- As of the closing date of the transaction, neither Paragon Mortgages nor Mortgage Trust has failed to repurchase a mortgage for breach of any of its respective representations in respect of that mortgage.
- The issuer must enter into a hedging arrangement, if required, to ensure that conversion will not affect the ratings on the notes.

Mandatory and discretionary further advances

If the issuer is unwilling or unable to make a discretionary further advance, Paragon Mortgages or Mortgage Trust may decide to do so on the condition that this advance is secured by a second mortgage over the property in question.

The issuer may make discretionary further advances, subject to certain conditions, which include the following:

- Lending guidelines must be satisfied.
- If applicable, provisions of the Consumer Credit Act must be complied with.
- Discretionary further advances may not be made out of funds notified as being available for redemption of the notes between the principal determination date and the interest payment date.
- As a result of the discretionary further advance (and any mandatory further advance) the LTV ratio for the entire pool may not increase by more than 1% relative to the LTV ratio at closing.
- Principal available funds or drawn amounts under the subordinated loan must be sufficient to fund the discretionary further advances.
- As a result of the discretionary further advance, the final maturity of the mortgage may not extend beyond two years prior to the legal final maturity of the notes.
- No more than 2% of the mortgages by current balance may be more than three months in arrears.
- The first-loss fund must be at its required amount.
- There must be no debit balance on the principal deficiency ledger.
- There can be no breach by the borrower of mortgage conditions.

In all cases where Mortgage Trust makes a mandatory further advance, the issuer will be obliged to make funds available from the principal ledger to fund this advance. If there are insufficient funds in the principal ledger, the administrator may draw on funds under the subordinated loan agreement to cover this deficiency.

In accordance with Standard & Poor's rating assumptions, as Paragon Finance does not have a sufficient rating, no reliance was placed on the mandatory further advances being financed out of the subordinated loan facility. Standard & Poor's is comfortable that the issuer's obligations to the mandatory further advances can be funded out of available redemption funds and, where applicable, the flexible drawing facility.

No mandatory further advances will be made if the borrower breaches any of the mortgage conditions. The issuer will not agree to make a discretionary further advance if the sum of the discretionary and mandatory further advances is greater than 16% of the notes to be issued (excluding Mortgage Trust redraws).

Redraw risk

Of the mortgages in the provisional pool, 28.06% are flexible mortgages. The terms of flexible mortgages allow borrowers to redraw amounts that have been paid in excess of the scheduled mortgage payments. If a borrower prepays more than 20% (or lower as agreed at origination) of the scheduled principal balance at any time, the borrower is required to pay a commitment fee of at least 1% of the amount by which the prepayment exceeds 20%. Borrowers can still prepay amounts above this limit without incurring a commitment fee, provided they cancel their right to redraw amounts above 20% of their current mortgage balance. Where redraw requests are validly made and funded, borrowers ultimately have the obligation to repay all amounts borrowed by the maturity dates of their mortgages.

A flexible drawing facility in an amount equal to £10 million will be initially available to the issuer to fund potential redraw requests if the issuer has insufficient funds to do so. On any interest payment date, if the maximum possible flexible drawing advances is less than 7.5% of the aggregate outstanding balance of flexible mortgages, the amount available under the facility will be the greater of (i) 5% of the outstanding balance of the flexible mortgages, (ii) £6 million, and (iii) the maximum amount the flexible drawing facility limit has been on any interest payment date on or after the date upon which it is first drawn. The facility amount may be varied subject to confirmation by Standard & Poor's that the proposed adjustment would not have an adverse impact on the then-current rating of the notes. Standard & Poor's views the size of the flexible drawing facility as adequate to cover any redraw requests that could arise, based on conservative assumptions. The facility will terminate once the class A notes are redeemed in full.

In circumstances where the redraw requests cannot be funded, borrowers might bring claims for damages, which may ultimately affect the issuer's obligations to noteholders. As yet there is no legal precedent to give clear guidance on how courts would treat potential claims against Mortgage Trust for redraw requests that are validly made but cannot be funded.

Note Terms And Conditions

The issuer is expected to issue three classes of notes, the class A, B, and C notes. The class A notes will rank senior to the class B and class C notes. The class B notes will rank senior to the class C notes.

Interest will be payable quarterly on the notes based on either three-month U.S. dollar LIBOR plus an annual margin (class A only), three-month British pound sterling LIBOR plus an annual margin, or three-month EURIBOR plus an annual margin. Margins on all outstanding classes will double after May 2010.

Mandatory redemption

The notes will be subject to mandatory redemption in part on each interest payment date, from available funds. There will be no mandatory redemption of the class B notes and C notes for the first five years from the closing date (unless the class A notes have been fully redeemed). After five years, the class A, B, and C notes will be redeemed pro rata. While the class A notes are outstanding, pro rata redemption will be conditional upon the following:

- The ratio of the class B and the class C notes to the aggregate outstanding of all classes of notes is twice the ratio at closing (i.e. credit support for class A notes has doubled);
- The balance on the principal deficiency ledger is zero;
- The minimum outstanding amount of the class B and C notes is 4.76% of the notes to be issued; and
- The three-months arrears balance is less than 7.5%.

Purchase of preclosing arrears

Based on the provisional pool data, the issuer will purchase mortgages with an approximate principal balance of £2.2 million that have an outstanding arrears amount in excess of one monthly payment. This outstanding arrears amount is known as the "purchased preclosing accruals and arrears". The maximum principal amount of mortgages in arrears by more than one month that will be purchased by the issuer is £5 million. The increased mortgage arrears amount will not present an additional risk to the transaction, as the quality of the portfolio is required to remain similar to that of the closing mortgage pool.

Optional redemption

The issuer may redeem all (but not part only) of the notes at their outstanding principal amount, together with accrued interest, if:

- A withholding tax is imposed on the notes or on payments by either party to the swap agreement; or
- The aggregate principal amount outstanding of the notes falls below 20% of the notes to be issued.

The issuer may also redeem at its option the notes on the interest payment date in May 2009 or at any subsequent interest payment date.

Final redemption

If not already redeemed, the class A, B notes, and C notes will be redeemed at their legal final maturity in 2041.

Withholding tax

The issuer will not be required to gross up for any withholding tax that might be imposed on the notes in future.

Protection Against Key Risks (Credit And Liquidity)

Mortgage interest rate setting

On behalf of the issuer and trustee, the administrators will set the rates of interest applicable on the relevant mortgages (other than the fixed-rate, base-rate-linked, or LIBOR-linked mortgages). The administrators must ensure that the weighted-average of the rate of interest applicable to the mortgages after taking into account all hedging arrangements, income received from the investment of funds in the transaction account, and income from redemptions, is not less than 1.6% until May 2010 and 2.0% thereafter, above the three-month pound sterling LIBOR applicable.

The administrators may set a lower rate of interest if the shortfall can be provided out of amounts available in the shortfall fund.

Subordinated loan and first loss fund

Before closing, Paragon Loan Finance (No. 2) and Mortgage Trust Services will make available to the issuer a subordinated loan facility that will be drawn on closing. The facility will be used to establish the first-loss fund, sized at 1.76% of the value of the outstanding notes (the "required amount") on closing. The cash standing to the credit of the first-loss fund will be transferred to the revenue ledger, and will then be applied by the issuer in accordance with the priorities of payment: Payment senior fees and expenses, interest on the notes, and clearance of principal deficiency ledger.

The required first-loss fund amount will be stepped-up to 2.26% if the two-months in arrears balance is greater than 3.00%.

If the three-months in arrears balance is at least 7.5% of the then-current balance of all mortgages, a liquidity amount trigger event will occur. This event will be deemed to be in effect until the class A notes have been redeemed in full.

If a liquidity amount trigger has occurred, and the class A notes are still outstanding at that time, then the liquidity amount shall be equal to 1.6% of the then-outstanding balance of the notes. Where a liquidity amount trigger is in effect, the first-loss fund required amount will increase to the greater of i) the liquidity amount plus 1% of the initial notes balance outstanding amount, or, ii) 2.26%.

While the trigger is in effect, the liquidity amount of 1.6% will be solely applied toward the payment of interest on the notes, in the following order of priority:

- Interest on the class A notes,
- Interest on the class B notes, but only if the sum of the debit balance on the principal deficiency ledger, and the interest payments on the class A and B notes from the liquidity amount do not exceed the sum of the aggregate principal outstanding on the class B and C notes (after the application of any amounts standing to the credit of the revenue ledger and the application of the first-loss liquidity excess amount).
- Interest on the class C notes, but only if the sum of the debit balance on the principal deficiency ledger, and the interest payments on the class A, B, and C notes from the liquidity amount, does not exceed the sum of the aggregate principal outstanding on the class C notes after the application of any amounts standing to the credit of the revenue ledger and the application of the first loss liquidity excess amount.

Paragon Loan Finance (No. 2) and Mortgage Trust Services may agree to make sufficient funds available to allow the issuer to make discretionary further advances if they cannot be funded from the available redemption funds.

Additionally, Paragon Loan Finance (No. 2) and Mortgage Trust Services may, at their discretion, make further amounts available under the subordinated loan agreement. It may do this to reduce the principal deficiency ledger to zero, and to bring the first-loss fund up to the required amount, thus enabling the issuer to fund the discretionary further advances from available redemption funds.

Further amounts may also be borrowed (i) to cover swap and hedging amounts that are junior in the priority of payments, (ii) to pay the issuer any prepayment fees waived by the administrator, and (iii) to fund the purchase of additional hedging instruments if they cannot be funded out of the issuer revenue ledger in accordance with the priority of payments.

Amounts borrowed under the subordinated facility are deeply subordinate in the priority of payments.

Collateral Details

The provisional mortgage pool of £560 million comprises 5,237 loans and was drawn up on April 30, 2005. The loans in the provisional portfolio were originated by Paragon Mortgages and Mortgage Trust between 1996 and 2005 and have been administered by either Paragon Finance or Mortgage Trust Services (each a member of the Paragon Group of Companies) since origination.

Features of the provisional mortgage pool include the following:

- Each loan is secured by a first legal charge of a residential property in the U.K.
- Of the pool, 100% are buy-to-let mortgages.
- Of the mortgages, 11.71% are repayment mortgages and 88.29% are interest-only mortgages.
- Of the loans, 48.49% were used for house and apartment purchases and 51.51% were used for remortgaging.
- The weighted-average LTV ratio of the mortgage pool is 77.51%.
- The average outstanding mortgage balance is £106,717.
- The largest concentration of mortgages by geographic area is in southeast England (including London) at 44.49%. There are no significant concentrations in other regions.
- The weighted-average term to maturity is approximately 20.97 years.

Standard & Poor's Stress Test

The rating analysis includes a conservative assessment of the credit risk inherent in the transaction. The credit enhancement levels have been sized after analyzing the effect that severe stress scenarios would have on the collateral. In determining the credit quality of a mortgage pool, an estimate must be made of a worst case of potential losses that could occur because of foreclosures. This estimate of potential losses is the amount of loss protection needed. All types of loans are thus eligible for inclusion in a pool, provided their credit risk can be quantified and adequate loss protection is supplied.

A feature of the portfolio is the high level of different types of buy-to-let mortgages. These include professional landlords and lettings by individuals through personal or corporate loans (usually through SPEs that are guaranteed by directors). The levels of underwriting by the originator are considered to be conservative, but the characteristics of the buy-to-let market create additional risks relative to a typical prime, owner-occupied mortgage portfolio (such as reliance on tenants to make timely rental payments), notwithstanding the weighted-average LTV ratio of this portfolio. These risks are mitigated through Paragon's greater understanding of the market as a specialist lender, its conservative buy-to-let underwriting policy, and its predominance in the professional landlord sector.

The cash flows simulate the performance of this portfolio in the transaction's documented structure under certain stressed scenarios. In addition, the issuer will make use of the basis swap to prevent mismatches in interest rates on any fixed-rate loans. Any bank accounts of the issuer are required to be with appropriately rated providers.

Surveillance Details

Surveillance will be maintained on the transaction until the notes mature or are otherwise retired. To do this, regular servicer reports detailing the performance of the underlying collateral will be analyzed, supporting ratings will be monitored, and regular contact will be made with the servicer to ensure that minimum servicing standards are being sustained and that any material changes in the servicer's operations are communicated and assessed.
